Jim Kahr delivers a top album here. You are addicted to the man from the very first note. The songs, his voice, the lyrics, what a poet this man is... wonderful.

It is one of those hidden gems in the immense range of good music. You put on this CD and you want to listen to it. The beauty of the songs will captivate you. As a frame of reference you could think of Tinsley Ellis, Bruce Springsteen, John Hiatt, John Mellencamp. Timeless music performed with class.

Jim Kahr has more solo work to his name but is best known in the Chicago area as a musician who has toured with many greats. To name a few: Junior Wells, Carey Bell, Jimmy Rogers, Koko Taylor, John Lee Hooker, Buddy Guy, Lightnin' Hopkins, Charlie Musselwhite. All songs on this CD are his own works, or as he said himself, when I asked him about it "This album consists of all my original compositions inspired by touring with those mentioned, they all influenced my style. They were masters of their trade. Fortunately, I had the pleasure of performing with them".

And how good that man can write songs: *Big City Struggle* is a song with a hard core of truth, life in the big city is not easy, especially in these uncertain and hectic times. Another theme he writes a lot about is relationships as expressed in the rustic *Hurtin' In The Morning*, a fantastic love story. Or the craving for the beloved in *With Somebody*, driven to a fantastic bass rhythm and with delicate guitar playing. A real gem!

He continues writing these classy songs with *Wondering Why*, beautiful lyrics and music as always. If you think, they won't get any better, *Got To Be A Way* comes around the corner, starting with a lyrical guitar intro as a highlight of this CD.

Take the first verse for example:

„It's been a long hard road, it's been a long hard day.  
Since you put those words in my head to stay.  
Feel like half a man, knowing my better half has gone.  
There has got to be a way for us to carry on along.“

Pure poetry, with beautiful guitar playing and compelling solo, it couldn't be better, it is a song that creeps into your soul. Another brilliant gem, *Listen To The Message*, with a saxophone intro, again a poetic text with Andrew Love, who puts a deep feeling into the song with his classy sax.

Where I thought compiling the yearly list of superb tracks would be a breeze, with Joe Bonamassa's 'Remdeption' no one can get over, I would like to present **this** CD to the readers. This is the highest level of text writing, these are lyrics that touch you.
